

Dentures Market is estimated to be 4.6 billion by 2029 with a CAGR of 6.2% during the forecasted period.

[Dentures Market](#) accounted for 2.7 billion in 2020 and is estimated to be US\$ 4.6 billion by 2029 and is anticipated to register a CAGR of 6.2%. Dentures are detachable fabricated teeth made from resins, acrylic (plastic), or metal. These fit neatly above the gums to substitute missing teeth and exclude potential problems caused by gaps. These are specially designed as substitutes for missing teeth. Dental dentures help prevent difficulties while eating and talking. Complete dentures also improve the design of the smile. Dentures generally require a structure for support, which is usually a full or partial plate. The plate is usually made from rigid acrylic or flexible polymer in order that it is often molded. Generally, so as to organize dentures, a dentist takes an imprint of a patient's gums which is used to make a mold. This mold is then used for the preparation of a wax model to which the teeth are added. The model is tested within the patient's mouth for confirmation of its color, size, and for the event of a plate which will fit tightly within the mouth. Acrylic resin is that the preferred material for the preparation of plates, because it is more compatible with dentures requiring a man-made gum line. Moreover, the fabric will be tinted, resembling a patient's natural gums. However, metal plates offer advantages like less risk of breaking, higher strength, and a far better fit, making these ideals for partial dentures.

The report **"Global Dentures Market, By Type (Full Denture, and Partial Denture), By Application (Repair Broken Teeth, Implanted Teeth, and Other), and By Region (North America, Europe, Asia Pacific, Latin America, and the Middle East & Africa) - Trends, Analysis and Forecast till 2029"**.

Key Highlights:

- In August 2019, Carbon and Dentsply inaugurated Lucitone Digital Print Denture material system and workflow. This collaborative effort aims at introducing the first dentures that were crafted by Carbon and digitally produced with the material by Dentsply Sirona.
- In February 2020, the inLab software 20.0 was launched by Dentsply Sirona. This software justified the customization of digital dentures which proved to be economically reasonable and laboratory oriented.

Analyst View:

The increasing incidence oral diseases such as gum disease and periodontitis are leading to tooth loss. Improper oral hygiene with gum disease increases the risk of preteen labor, diabetes, susceptibility to influenza and health conditions such as heart attacks and strokes. According to the Global Burden of Disease Study 2017 estimated that oral diseases affect close to 3.5 billion people worldwide, with caries of permanent teeth being the most common condition. Globally, it is estimated that 2.3 billion people suffer from caries of permanent teeth and more than 530 million children suffer from caries of primary teeth.

Key Market Insights from the report:

The global dentures market accounted for 2.7 billion in 2020 and is estimated to be US\$ 4.6 billion by 2029 and is anticipated to register a CAGR of 6.2%. The market report has been segmented on the basis of type, application and region.

- Depending upon type, the partial denture segment is projected to grow at highest CAGR over the forecast period.
- Depending application, the repair broken teeth segment is projected to grow at highest CAGR over the forecast period.
- By region, Europe earned the most important dentures market share with revenue of USD 878.4 million in 2019. This is often attributed to the increasing prevalence of cavity and therefore the growing presence of the edentulous population. Additionally to the present, an increase within the expenditure on dental procedures and therefore the rising number of dentists also are contributing to the expansion of the regional market.

Competitive Landscape:

The prominent player operating in the global dentures market includes Ivoclar Vivadent AG, GC Dental, Kulzer GmbH (Mitsui Chemicals, Inc.), Modern Dental Group Limited, COLTENE Group, Dentsply Sirona, SHOFU Dental GmbH, Global Dental Science, Zimmer Biomet, and VITA Zahnfabrik.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the global market are included in the report.
